Netherlands

This procedure is being divided into the following parts:

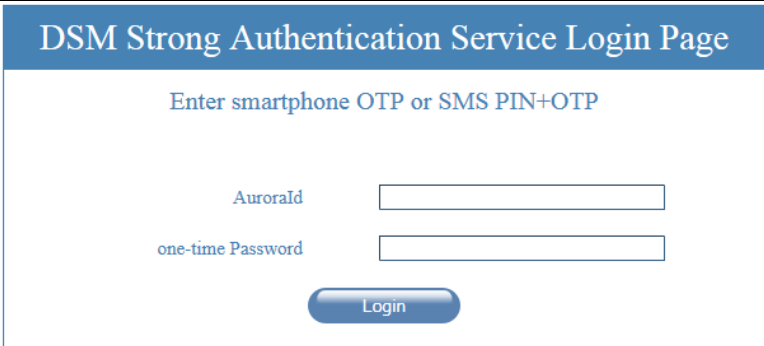

- A. Configure Token and PIN-code (First time)
- B. Login to DSM Strong Authentication Service

A. Configure Token and PIN-code

1. For the access to DSM with a token you will receive a SMS text message to finalize the soft token request On your mobile phone locate the text message sent by ‘DSMSAS’ The text message contains your User ID and Initial PIN. The Initial PIN is temporary and needs to be changed into a PIN-code which is easy to remember for you	
2. When you need to use your token you will be prompted with the following screen	

3. At AuroraID type in your User ID from the SMS Type the One-Time Password: PIN+TokenCode <i>Example: 30226F2D3FW98</i> <i>Note: Do not type the plus (+) sign</i> Click Login	
4. At the first logon a new PIN is required Choose a new PIN (min. 5 numbers, max. 16 numbers) and type it twice <i>Example: 54321</i> <i>Note: make sure you can remember the PIN code</i> Click Login	
5. After typing your new PIN twice you will immediately receive a new text message with a new TokenCode <i>Note: Always use the last text message you received from DMSSAS</i>	

B. Login to DSM Strong Authentication Service

1. On the following screen you need to login with your token.	
2. At AuroraID type in your User ID received in your first SMS Type the One-Time Password: PIN+TokenCode <i>Example: 54321GC5DL91U</i> <i>Note: Do not type the plus (+) sign</i> <i>Note: Always use the last text message you received from DMSSAS</i> Click Login
